

Dr. Proctor

The attached is being passed to NSCIC Working Group members to help them in getting ready for a 20 November meeting at which the sole substantive item (according to present plans) will be a critique of the Intelligence Community out of which, hopefully, will evolve the work program of the Group. We would like to get this in the mail by COB Tuesday.

This discussion is intended to follow through on the suggestion you made at the Intelligence Panel meeting of 25 October.

Gen Wilson asked me to check whether you had any other comments which should be included in this "check list."
